

Guidelines for Paper Submission

The IEEE Transactions on Neural Networks and Learning Systems follows the format standards of the IEEE. The IEEE Author Center can be accessed

here: <https://journals.ieeeauthorcenter.ieee.org/create-your-ieee-journal-article/create-the-text-of-your-article/structure-your-article/>.

Here are some of the general guidelines. A list of 4–5 keywords (index terms) and an abstract (described below) are required for all manuscripts submitted to this journal. When submitting a new article through [IEEE Author Portal](#), you may choose your own keywords related to the submitted manuscript. The submitted manuscript must be in the following format:

- PDF format;
- Singled-spaced, double column, standard IEEE published format.

All pages should be numbered. Provide an abstract of reasonable length that is an informative summary of the paper, including any important results found or conclusions drawn. Authors are encouraged to put detailed derivations in appendixes.
