

Aims & Scope

The *IEEE Transactions on Pattern Analysis and Machine Intelligence* publishes articles on all traditional areas of computer vision and image understanding, all traditional areas of pattern analysis and recognition, and selected areas of machine intelligence, with a particular emphasis on machine learning for pattern analysis. Areas such as techniques for visual search, document and handwriting analysis, medical image analysis, video and image sequence analysis, content-based retrieval of image and video, face and gesture recognition and relevant specialized hardware and/or software architectures are also covered.

Publication Fees

This publication is hybrid, meaning that it is supported by subscriptions and applicable article processing charges (APCs). Although there is no cost for publishing with IEEE, authors may wish to take advantage of some of our fee-based offerings, for example, choosing to publish open access in a hybrid journal. Visit the [IEEE Author Center](#) for more information on available options. The open access APC for this title is **\$2,645 USD**. [Learn more](#)
